Membership Management System
Key features

Sell Subscription Plans

Create and sell any type of subscription plan to meet your business requirement.

- ✔ Support both free and paid subscription plan.
- ✔ **Subscription Expiration**: After a specified period of time (Days/Weeks/Months/Year) or on a fixed date (example 31-12-2019) - not depends on the sign up date.
- ✔ **One time subscription** (manual renewal) or **recurring subscription** (automatic renewal). For recurring subscription plan, you can also set up trial price and trial duration.
- ✔ **Trial unique memberships:** Once a subscriber used up the trial he can't renew it or subscribe again to the plan.
- ✔ **Renew Options** to allow subscribers to renew their subscriptions.
- ✔ **Upgrade Options** to allow subscribers to upgrade/downgrade his subscription to a higher/lower level subscription plan (for example, from **Basic** to **Pro** membership)..

Powerful Custom Fields

Create custom fields to collect any information you want from your subscribers.

- ✔ Support 17 field types: Text, Url, Email, Number, Tel, Range, Textarea, List (Select), Checkboxes, Radio, Date, Heading, Message, File, Countries, State, SQL.
- ✔ Each custom field can be assigned to all, one or several selected subscription plans.
- ✔ **Conditional Fields**: Show/hide a field base on selected option on another field.
- ✔ **Custom Fee Fields**: The price which subscribers have to pay for the subscription can be calculated based on what they choose on registration form.
- ✔ **Joomla! user groups integration**: Assign subscriber to certain Joomla! user group(s) depend on the option(s) he chooses on a custom field.

Resources Access Restriction

Monetise your content by giving access to restricted resources(menus, modules, articles, K2 items, urls, documents...) to paid subscribes only.

- ✔ Restrict access to **anything** on your site using **Joomla core ACL method**.
- ✔ Restrict access to individual Joomla! article or all articles from certain categories.
- ✔ Restrict access to individual K2 item or all items from certain K2 categories.
- ✔ Restrict access to individual page or all pages from certain categories created by SP Page Builder extension.
- ✔ Restrict access to any pages on your site using **Membership URL Restriction** plugin.
- ✔ Use **Downloads Manager** plugin to give your subscribers download files/documents added for each subscription plan.

Well Organized, Logical User Profile

Subscribers can access to user profile page to:

- ✔ View and update profile data.
- ✔ See list of subscription plans he subscribed to, when it's started, and when it will be expired.
- ✔ See subscriptions history, download invoices for his payments.
- ✔ Choose from one of renew options (if available) and process renewal.
- ✔ Choose from one of upgrade options (if available) and process upgrade/downgrade membership.
- ✔ Cancel recurring subscription.
- ✔ Update credit card data for recurring subscriptions.
- ✔ See restricted resources which are available for his subscriptions and access to the item they want. (articles, documents, k2 items, pages....).

Easy Subscriptions Management

- ✔ List, Filter, Search for subscriptions.
- ✔ Add, Modify, Delete, View subscription.
- ✔ Approve/Publish offline payment subscriptions.
- ✔ Renew, refund a subscription.
- ✔ Cancel a recurring subscription.
- ✔ Export/Import subscriptions into/from CSV/Excel file.
- ✔ Mass Mail selected subscriptions.
- ✔ Resend confirmation email to selected subscription.

Membership Management System

Joomla! User Groups Integration

Use built-in Joomla! Groups plugin, you can setup each subscription plan to:

- Assign subscribers to selected user groups when they subscribe for the plan.
- Remove subscribers from selected user groups when their subscription expired.
- Base on the assigned user groups, you can use powerful Joomla! ACL to control what they can access, what they can do (add/edit/delete items) on your site.

Flexible Coupons System

Create coupon codes to give your users discount when they subscribe/renew/upgrade their membership.

- **Discount Type**: Fixed Amount or Percent.
- Coupon can be assigned to all or selected subscription plans.
- For recurring subscription, discount can be applied for first payment or for all payments.
- Limit total number of times a coupon can be used.
- Limit number of times a coupon can be used by one subscriber.
- Specify duration (from date - to date) a coupon can be used.
- Export/Import coupons to/from CSV/Excel file.
- **Batch Coupons Generation:** Allow generating any number of coupons with single click.

Group Membership

Allow one person (group admin) to subscribe for a group membership plan and then add members, manage subscriptions for whole group. It's useful in case you want to offer membership for whole company/organization or parent subscribe for all their children...

Synchronize Profile Data

Support synchronizing subscriber's data with **Joomla! user profile, user custom fields** and third party extensions includes: **Community Builder**, **Jomsocial**, **EasySocial**, **EasyProfile**.

Beautiful, Clean, Responsive Layouts

- Support most popular frontend frameworks: **Twitter Bootstrap 2, 3, 4, 5** and **UIkit 3**.
- Adapt itself to work with any templates, so you can use any template you like.
- 5 layouts options to display subscription plans: **Default** (list), **Columns** (grid), **Pricing Table**, **Pricing Table Circle**, **Pricing Table Flat**.
- 2 layout options to display subscription form: **Default** and **Columns**.
- 2 layout options to display members list: **Table** and **Columns**

Advanced Tax Rules Support

Setup tax rules to charge tax for subscriptions.
In the simplest setup, you can have a single/ flat tax rate for the whole system.

- Each subscription plan can have it own tax rate (you can even disable tax for the plans you want).
- You can setup different rates for each country/state.
  - Fully support **EU Tax Rules**.

Members Directory

Support displaying, searching for subscribers from one or all subscriptions plan like a members directory. Administrator can configure what fields to be displayed on Members List and Members details page. Subscribers can choose to opt-in themself from this list.

Newsletter Integration

Allow assigning subscribers of each subscription plan to selected mailing lists in **ACYMailing** and **Mailchimp** so that you can send newsletters to subscribers whenever you want.

Membership Management System

Support 50+ payment gateways

Configure your favourite payment gateways to receive payments from members's subscriptions.

- ✓ The most popular payment gateways: PayPal, Authorize.net (AIM), Eway, Worldpay and Offline Payment plugins come with the extension by default.
- ✓ Other payment gateways such as PayPal Pro, Stripe, 2Checkout, Payfast, Authorize.net SIM (Server integration method) , Mollie... are paid payment plugins, cost 24.99$. See **Payment Plugins** tab to see list of available paid payment plugins.
- ✓ Right now, there are only 5 payment plugins support recurring subscription: PayPal, Authorize.net (AIM), PayPal Pro, Stripe and Mollie.
- ✓ There are only 4 payment plugins allow subscribers to cancel recurring subscription directly one your site: PayPal Pro, Authorize.net (AIM), Stripe and Mollie.

Smart Multilingual

If your site is a multilingual website, you can translate everything in the membership system (categories, plans, form fields, email messages, language items...) to all the languages use on your site.

Powerful Emails Notification System

- ✓ **Notification Emails** sent to administrator when someone register/ sign up for a subscription plan.
- ✓ **Confirmation Emails** sent to subscribers when they subscribe for a plan or their registration is approved by administrator.
- ✓ **Notification Emails** sent to administrator when a subscriber update his profile in the frontend.
- ✓ **Pre and Post reminder emails** sent to subscribers **before/after** their subscription is expired so that they can be aware of the expiration and renew their subscription.
- ✓ All email messages are configurable, you can edit these messages using your favourite Joomla! WYSIWYG editor.
- ✓ Emails sent from the system can be logged and viewable via Tools -> Emails Logs.

Schedule, Drip-Feed Content

Scheduling release content (Joomla! articles/ K2 items) to your subscribers X-days after they subscribed for your subscription plans. For example, release first article to subscribers 2 days after they subscribed, release the second article will be released 3 days after they subscribed and so on...
